

Kako pretvoriti prezentaciju u .pdf oblik?

Zbog lakšeg preuzimanja u virtualnim učionicama

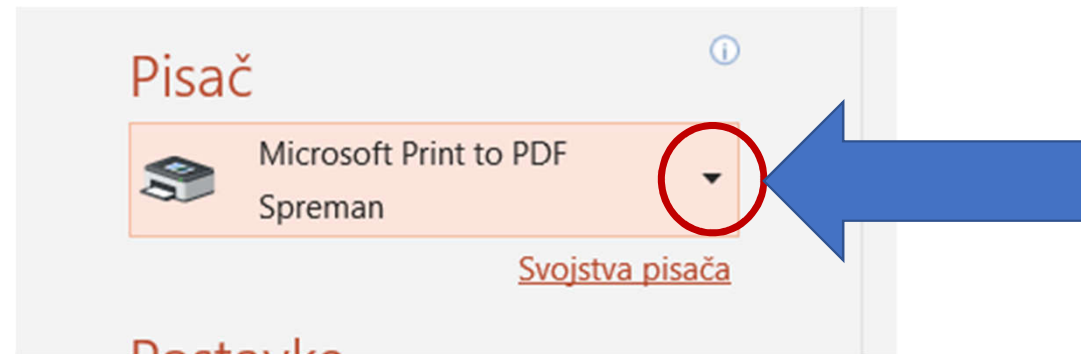

1. Otvoriti prezentaciju u programu PowerPoint

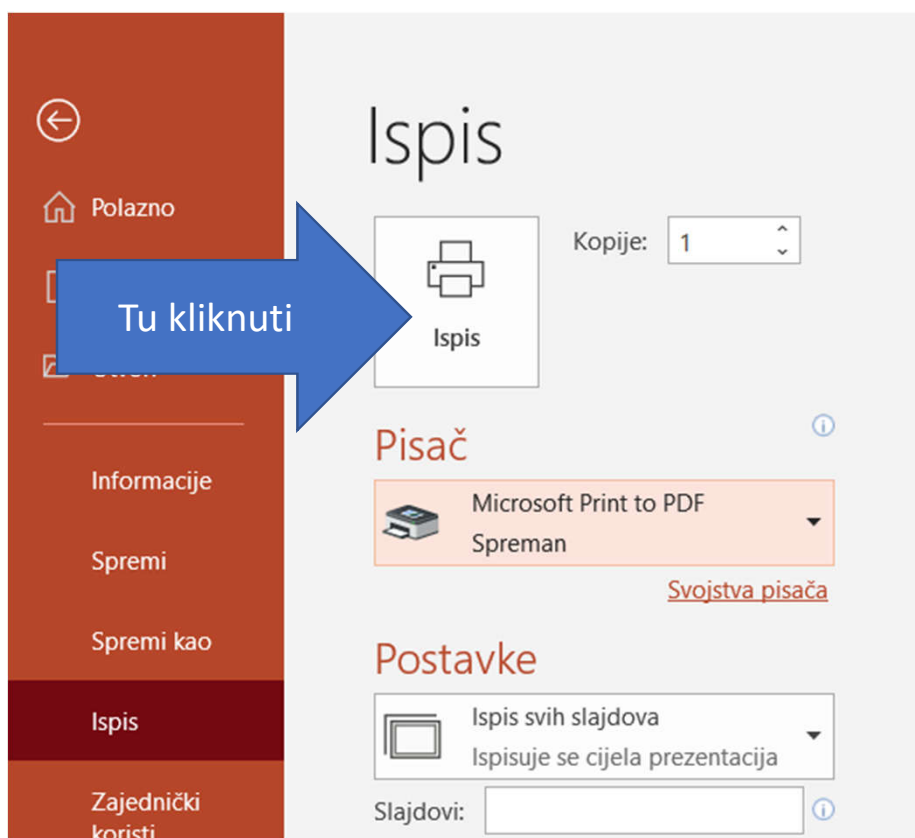

2. Odabrati Datoteka (File) – Ispis (Print)

The screenshot shows the print dialog box in a software application. On the left is a vertical menu with options: Polazno, Novo, Otvori, Informacije, Spremi, Spremi kao, Ispis (highlighted), Zajednički koristi, Izvezi, and Zatvori. A blue arrow labeled "1. korak" points to the "Ispis" option. The main area is titled "Ispis" and contains a printer icon, a "Kopije:" dropdown set to 1, and a "Pisač" section with a dropdown menu showing "NPIFBCD89 (HP Color Laser...)" and "Spreman". A blue arrow labeled "2. korak" points to this printer selection. Below are "Postavke" (Settings) for print range, orientation, and color.

3. Promijeniti u izborniku u Microsoft Print to PDF

4. Stisnuti Ispis (Print)

Naizgled ništa se neće dogoditi

- U istoj mapi gdje se nalazi i prezentacija, stvorit će vam se novi dokument s istim imenom (kao i prezentacija), ali u .pdf obliku
